About Me

I am an innovative and results-driven ICT developer passionate about solving complex problems through critical thinking and creativity. With knowledge of software development, IoT, electronics, embedded systems, and automation, I strive to transform ideas into practical and effective technological solutions. My commitment to continuous learning enables me to adapt to emerging technologies and strengthen my technical expertise. I am motivated, persistent, and dedicated to developing reliable solutions, overcoming challenges, and creating meaningful impact through innovation and professional growth.

Professional Skills

- Critical Thinking
- Problem Solving
- Innovation
- Project Management
- Creativity
- Effective Communication
- Teamwork & Leadership
- Adaptability

languages

English

Sinhala

Education

Bachelor of Information and Communication Technology (Honours)
Faculty of Technological Studies, Uva Wellassa University of Sri Lanka

Expected Graduation: 2026

Work Experience

Freelance Technical Projects 2019 – Present

IOT & Electronic Project planning & implementation
Graphic design & artwork hotography - Photoshop
videography & Sound Editing - Filmora , VirtualDj Ab Premium Pro
Automobile and automation machine design repair (CNC, PLC systems)
Electrical and electronics (CCTV security systems, house wiring)

Residue Solution (Pvt) Ltd

Intern – Full-Stack Software Engineer - May 2025 – November 2025
Associate Software Engineer (Remote) - November 2025 – May 2026

Projects & Innovations

Auto nomas vehicale according to color light

Developed an Arduino-based system using color sensors, IR, and RF signals for traffic light detection and action control. Integrated Front Vehicle Detection (FCR) mode for real-time monitoring and safe driving.

IoT-Based Smart Hotel Sustainable Management System

Developed an IoT-Based Smart Hotel Sustainable Management System to improve energy efficiency and resource management. Designed to monitor and optimize electricity and water usage through smart sensors and automated control systems.

Greenhouse Automation and Monitoring System

Developed an AI-powered greenhouse system to monitor temperature, humidity, soil moisture, and NPK levels via a mobile app. Integrated automated irrigation, fan control, plant disease detection, and AI-based recommendations for nutrient management and plant health.

Smart Healthcare and Medicine Dispensing System

.
Developed an IoT-Based Smart Healthcare and Medicine Dispensing System integrating doctor appointment booking, electronic prescriptions, pharmacy integration, and automated medicine dispensing to streamline healthcare services and improve patient convenience.

Automated Weaving Machine

Engineered an advanced weaving machine with pneumatic feeding, length tracking, and precision needle control. Designed using SolidWorks and integrated real-time electronic monitoring for optimized productivity and accuracy.

IoT-Based Smart Waste Management System

Developed an IoT-Based Smart Waste Segregation and Monitoring System that automatically separates waste by type, monitors bin capacity, analyzes waste data, and integrates geographical location tracking to optimize waste collection and improve waste management efficiency.

Technical Skills

Programming Languages: Java, C, C++,C#, JavaScript,

Web Development: React.js ,Next.js ,Node.js,Express.js,RESTAPI,HTML5,CSS3,TailwindCss,Bootstrap,RESTful APIs,CRUD,Full-Stack Development

Database Management: MySQL,MongoDB,Firebase,Supabase, postgreSQL

Software Engineering : Rapid ApplicationDevelopment, Data Handling,System Design and implementation

Version Control: GitHub,Git

IoT & Embeded System : Arduino programming (C++) Magic Blocks IoT , NodeMCU,ESP32,Sensor integration, microcontroller programming

Mobile App Development: Flutter, React Native

UI/UX & Design Tools : Figma, Adobe Illustrator, Photoshop , Canva

Cloud Computing: Basic knowledge of AWS and Azure,Vercel,Hostinger

IDE Tools: Visual Studio Code, Antigravity

Electronic & PCB Design: Electronic Design PCB prototype and integration, Hardware Testing & Troubleshooting

Sports & Activities

Karate

Sri Lanka Karate-Do Federation Southern Province Skill Review 2013

Kensho Karate National Open Kata Championship – 2nd place (2014)

Weightlifting

WeightLifting Team uva wellassa university.

Club & other Activities

Robotics Association Society (RAS)
LEO Club of Uva

Professional Projects

website & Hotel Booking Management System: - Developed a React-based hotel booking system featuring responsive UI, attractive customized designs, room reservations, booking management, customer registration, and availability tracking.

Gym Management System: Gym Management System: Developed a web-based gym management system featuring QR code scanning and fingerprint authentication for member identification, attendance tracking, membership management, CRUD operations, and fitness data analysis.

ERP System: Developed a web-based Enterprise Resource Planning system featuring inventory management, employee management, business operations tracking, CRUD operations, and data analysis to improve organizational efficiency.

Task Management Kanban Tool : Developed a web-based Kanban system featuring drag-and-drop task management, team member assignments, task tracking, CRUD operations, and project progress monitoring to improve team collaboration and workflow efficiency.

Independent Study Projects

Smart Student Attendance System:A real-time web application for attendance, scheduling, and data analysis for educational institutions.

Frontend - React.js , HTML/CSS , JavaScript Backend - Node.js , Express.js

WinIt - This Auction web application, developed with NetBeans IDE, uses HTML, CSS, JSP, Servlets, and Bootstrap for responsiveness, MySQL for bid data management, and Figma for design prototyping.

AI-Based Fake Content Detection System - Conducted literature review, system design, and architectural planning for an AI-powered platform to detect fake news and misleading content, including AI model selection, database design, and system architecture.

Awards & Achievements

National Exhibition for Invention and Innovation (SAHASAK NIMAVUM) – 2016

All Island School Inventors' Competition by SLASS – 2016 Island 1 st

Sirasa TV Abiman Waram Award – 2019

Successfully Completing the Millennials Workshop – 2019

Y FM After School Radio and TV Program – 2021

The Institutin of Engineers , Sri Lanka Techno Exhibition 2023 nominee

Techno Exhibition by The Institution of Engineers, Sri Lanka 2023 2nd Place

Non-Related Referees

Mrs. W.B.M.S.C. Wijaya koon
Lecturer (Probationary),
Dept. of Information and Communication Technology,
Faculty of Technological Studies,
Uva Wellassa University.

Phone : (+94) 716188880
